

SGRAFFITO STEPS

1: Create a coil pot from coils.
Make nice even coils.

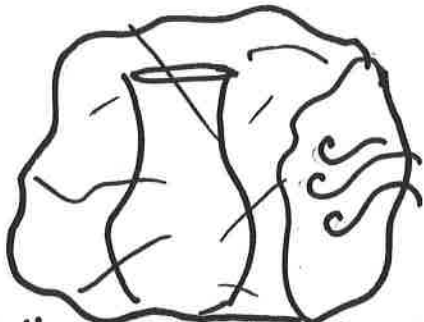

2: Smooth all of the coils, inside and out with a rib tool.

3: Smooth your project even more.

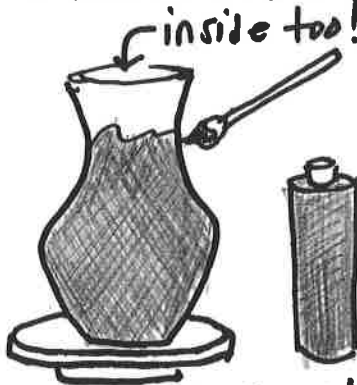

4: Let your project dry so that it is leatherhard but not bone dry.

leatherhard = clay doesn't move and is cold.

5: Choose a contrasting glaze color and glaze 3 even layers.

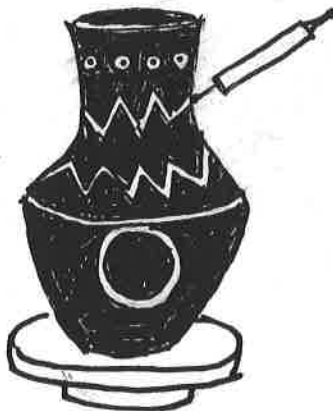

6: Allow the glaze to dry.

7: Gently pencil in your design.

8: Using the stylus embossing tool, carve into the lines until you see clay. Don't make a deep gouge.

9: Clean off any crumbs (glaze crumbs go in the garbage!)

10: When your project is done, you put your name on it and put it on the Greenware cart.
